

1 Introduction

Retrieval quality depends on the heading path attached to every chunk, because the chunker copies it into the text that gets embedded.

1.1 Scope of the study

Retrieval quality depends on the heading path attached to every chunk, because the chunker copies it into the text that gets embedded.

1.2 Related work

Retrieval quality depends on the heading path attached to every chunk, because the chunker copies it into the text that gets embedded.

2 Methods

Retrieval quality depends on the heading path attached to every chunk, because the chunker copies it into the text that gets embedded.

2.1 Data collection

Retrieval quality depends on the heading path attached to every chunk, because the chunker copies it into the text that gets embedded.
